Career Objective

Computer Science student with strong foundations in software engineering, machine learning, and backend development. Passionate about building AI-powered applications using LLMs, scalable cloud-native technologies. Seeking opportunities to contribute to innovative AI platform engineering solutions.

Academics

CSE-(Data Science)	9.26
From CVR College of Engineering	2023-2027

Courses Completed

Programming in Java – NPTEL, IIT Kharagpur (Elite)
Database Programming with SQL – Oracle Academy
Database Design – Oracle Academy
Smart Interviews (“Smart Coder”) – Global rank (604/53827)

Technical Skills

Programming : Python, Java, JavaScript, R
AI/ML : Machine Learning, Deep Learning, NLP, Generative AI, RAG
Frameworks : LangChain, FastAPI, Streamlit, React.js, Spring Boot
Tools : Git, GitHub
Databases : Oracle SQL, SQL

Technical Projects

Title	: Face Recognition Attendance System
Description	: Developed an AI-powered attendance system that uses facial recognition for real-time student identification and automated attendance tracking. Integrated database storage for attendance records and built a dashboard for monitoring and reporting.
Tech Stack	: Python, OpenCV, TensorFlow/Keras, Flask/FastAPI, MySQL.
Title	: Stock market analysis and prediction (Stockstream ai)
Description	: Implemented a real-time stock analytics and prediction system that streams, processes, and visualizes live market data while generating predictive insights using dual model architecture.
Tech Stack	: Java, Spring Boot, Apache Spark, JavaScript, HTML, SQL, WebSockets.
Dataset	: Real time stock market data (Streaming source).

Coding Profiles

[LeetCode](#) , [HackerRank](#) , [Github](#)

Solved 300+ Leetcode problems and achieved a peak rating of 1892, strengthening problem-solving skills.
Solved 500+ problems on Codechef, Codeforces, and Smart Interviews.
